PROJECTS

YumYard

YumYard is a dynamic web application designed to help users discover, manage, and share recipes. This repository contains the client-side code for YumYard.

E-commerce Project

Developed a responsive e-commerce website using React for a dynamic user interface and Node.js/MongoDB for secure backend functionality. Implemented key features like product catalog, shopping cart, and checkout for a smooth user experience

GlycoVision

Glyco Vision is a comprehensive web application designed to help users track and manage their blood sugar levels. It provides insightful charts and offers personalized advice based on symptoms. Additionally, it includes features for finding pharmacies on duty and giving patient advice.

Portfolio Website

A portfolio website showcasing my skills and experience as a web developer.
